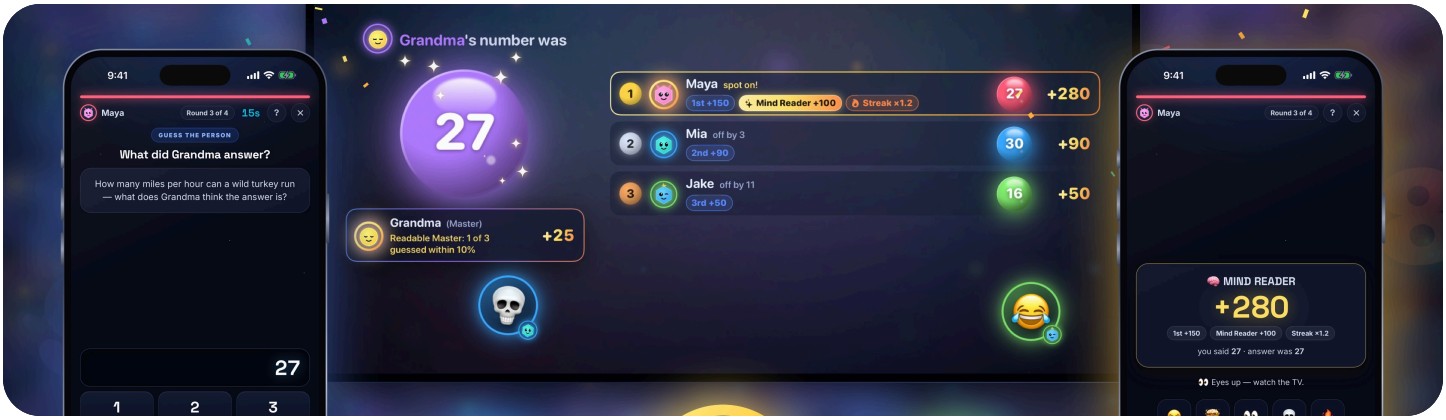
NUMBO

FACT SHEET · OCTOBER 2026



Numbo Trivia

The party game where you guess what your friends guessed.

Each round, one player secretly locks in a number for a trivia question. Everyone else guesses what **that player** said, not the real answer. Closest guesses score, and an exact hit earns the Mind Reader bonus.

How it plays

1. The Master picks a category and locks in a secret number.
2. Everyone guesses the Master's number on their own phone.
3. The reveal: closest guesses score; spot on is a Mind Reader.

Three ways to play

- **Apple TV:** friends scan a QR code and play in their phone's browser. Nothing to install.
- **Party on phones:** no TV needed. The host shares a four-letter code.
- **Solo vs bots:** three bots, unlimited, works offline.

Highlights

- More than 7,300 questions in 30 categories
- Free seasonal packs: Thanksgiving, holiday season, New Year's Eve, Super Bowl
- Family mode: kid-friendly categories and everyday numbers
- Live emoji reactions, streaks and an underdog bonus
- Reduce motion, high contrast and a dyslexia-friendly font on iPhone and iPad
- No ads, no tracking, no sign-up
